NAME OF HOSPITAL: _____

NEWBORN ADMISSION/DISCHARGE RECORD

KEY: ✓ = Within Defined Limits (WDL) * = Significant Findings
(See reverse side of form for Parameters.)

SECTION A: Birth Details

Date of Birth: _____ (YYYY/MM/DD) **Time of Birth:** _____ h (HH:MM) ☐ Vaginal Birth ☐ Caesarean Birth ☐ Assisted Vaginal Birth

Maternal: ☐ **Blood Type:** _____ **Rh:** ☐ Pos ☐ Neg **Antibody Screen:** ☐ Pos ☐ Neg **Hepatitis:** ☐ Pos ☐ Neg ☐ Unknown
☐ **GBS:** _____ ☐ Pos ☐ Neg ☐ Unknown **Intrapartum Antibiotics:** ☐ Yes ☐ No

Infant: ☐ Cord Blood Sent ☐ **Blood Type:** _____ **Direct Antiglobulin Test (DAT)/Coombs:** _____ ☐ Pos ☐ Neg ☐ Not Done

Apgar Score: _____ (01) / _____ (05) / _____ (10) **Head Circumference:** _____ cm **Length:** _____ cm (Complete Growth Chart) **Birth Weight:** _____ gm

Discharge Weight: _____ gm RN/RPN Initials: _____ (Birthing Centre) _____ (Mother/Baby Unit)

SECTION B: Admission/Discharge

ADMISSION:				DISCHARGE: ☐ ID Bands checked prior to discharge		
Exam: Date (YYYY/MM/DD): _____ Time: _____ **Vital Signs:** T _____ P _____ RR _____ BP _____ MAP _____		Physician/ Midwife Initials	Nurse Initials	**ID#:** _____ **Exam:** Date (YYYY/MM/DD): _____ Time: _____	Physician/ Midwife Initials	Nurse Initials
1. Head and Neck/Palate						
2. Eyes/Ears						
3. Clavicle/Thorax						
4. Respiratory						
5. Cardiovascular						
6. Gastrointestinal/Abdominal						
7. Genitalia						
8. Musculoskeletal						
9. Hips						
10. Spine						
11. Neurological						
12. Integument						

Diagnosis: ☐ Healthy Term Newborn ☐ Preterm ☐ Risk for Hypoglycemia ☐ Risk for Hyperbilirubinemia
☐ Other: _____

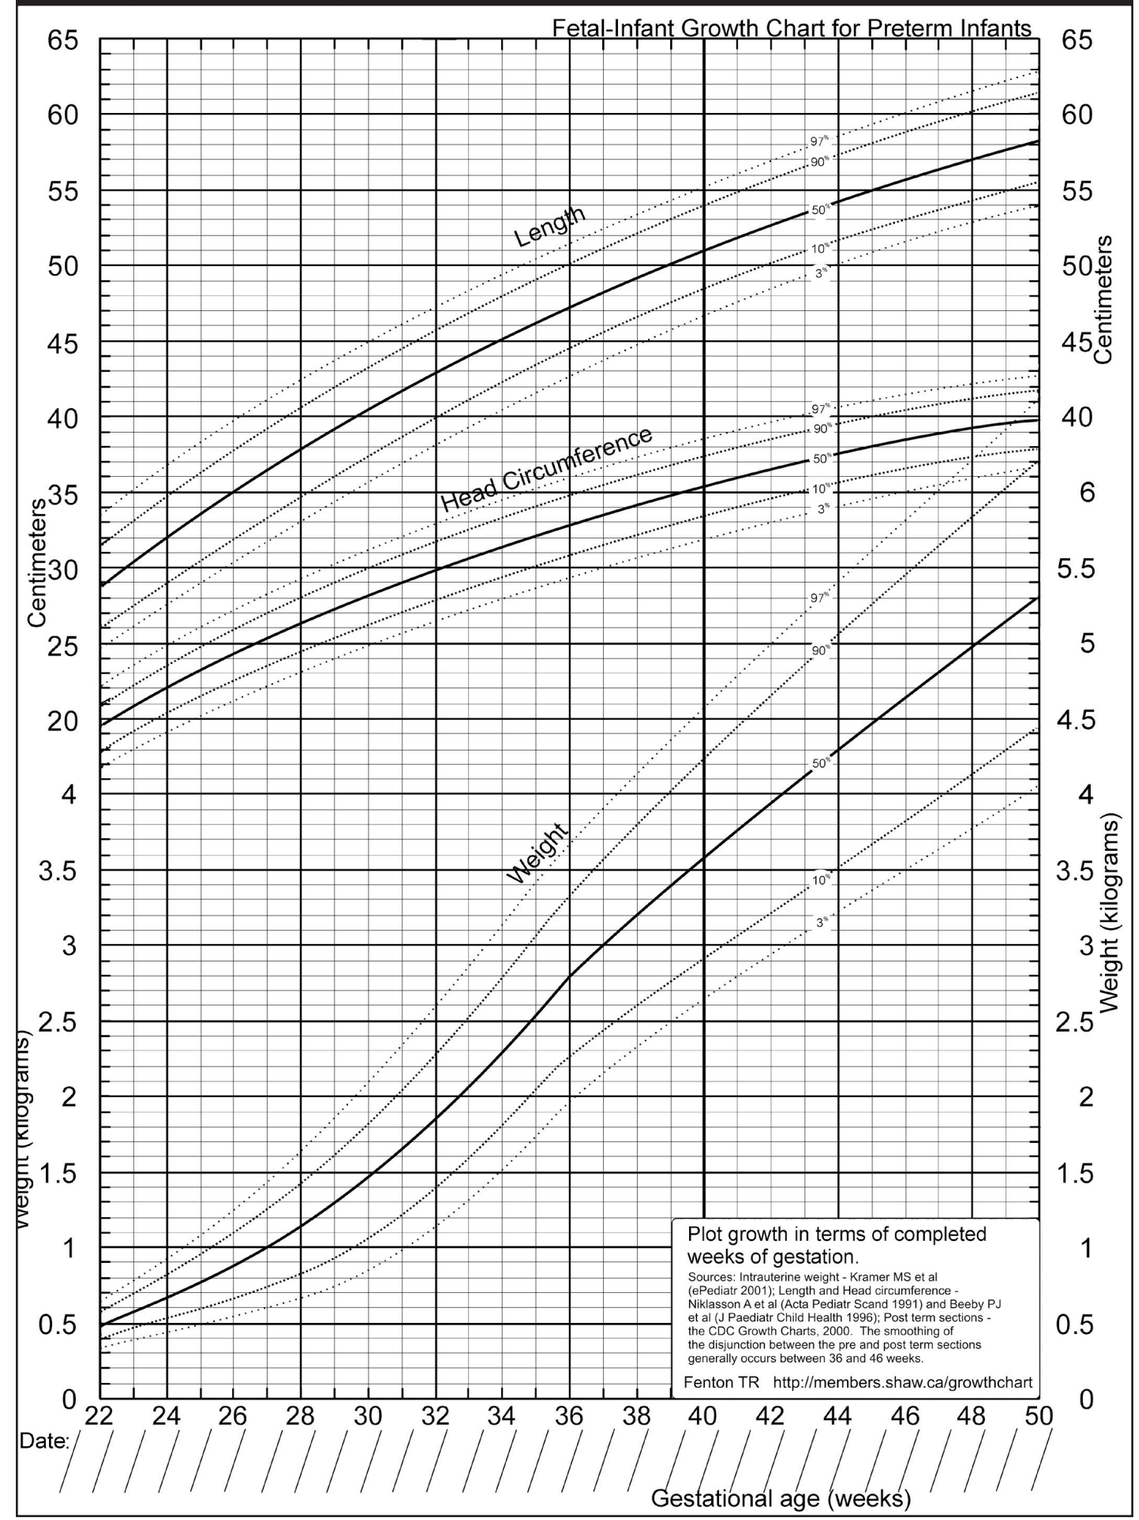
Medications: ☐ Vitamin K 1 mg IM Date (YYYY/MM/DD): _____ Time: _____ Initials: _____
☐ Erythromycin 0.5% ou Date (YYYY/MM/DD): _____ Time: _____ Initials: _____

Admission Comments:	Discharge: TcB/TSB _____ @ _____ hours of age
	TcB/TsB Results: ☐ High ☐ High - Intermediate
	☐ Low - Intermediate ☐ Low
	Newborn Screen Completed: Date: _____ Time: _____
	Hearing Test: Left Ear: Pass / Refer / Fail **Right Ear:** Pass / Refer / Fail
Consults:	Follow-up: ☐ Repeat TcB/TSB in 24 hours
	☐ Repeat TcB/TSB in 24-48 hours
	☐ Healthcare provider in 2-3 days (routine newborn care)
	Consults:
Printed Name/Signature:	Printed Name/Signature:

SECTION C: Feeding Pattern at Discharge

	INITIALS
☐ Breastfeeding Only ☐ Latches Well ☐ Formula Feeding Only ☐ Bottles Well	
Reasons for Breastmilk Substitutes (Formula): ☐ Informed Parental Choice ☐ Infant Hypoglycemia ☐ Maternal Health Concerns ☐ Unknown	

Birth Weight for Gestational Age



*BIRTH WEIGHT FOR GESTATIONAL AGE Adapted from Babson and Benda's Chart Pediatrics 2003, 3:13, Fenton TR

GUIDELINES FOR NEWBORN ADMISSION/DISCHARGE RECORD

Section A: To be completed by Nurse
Section B: Completed by physician/midwife and nurse
Section C: To be completed by Nurse

NORMAL PARAMETERS:

1. **Head and Neck:** Head rounded with mild to moderate molding. Fontanelles soft and flat. Sutures slightly separated, may be overlapping due to molding. Absence of scalp electrode site or caput. Nose is midline, not protruding. Symmetrical movement of mouth and face. Neck short and midline; full range of motion present. Lips and palate intact. Tongue not tied.

2. **Eyes/Ears:**
   Eyes: Eyes symmetrically placed and less than 2 cm apart, clear. Sclera white. Red reflex present. Eyelids close completely. Absence of sclera hemorrhage; absence of drainage from eyes.

   Ears: Normally placed with pinna at or above level of outer canthus of eye; pinna well formed and has good recoil. Absence of abrasions or lacerations behind the ear.

3. **Clavicles/Thorax:** Clavicles intact. Thorax symmetrical and rounded. Breast tissue symmetrical with raised areola.

4. **Respiratory:** Respirations 40-60 per minute, unlaboured and quiet. Breath sounds equal and clear bilaterally; audible in all lung fields. Absence of rales, rhonchi, congestion, grunting, retractions, stridor and nasal flaring.

5. **Cardiovascular:** Apical pulse for Term Newborn: 100-140 beats/minute, Preterm: 120-160 beats/minute. Absence of displaced apical beat, murmur or arrhythmias. Central colour pink/WNL for ethnic background. Acrocyanosis may be present. Palpable femoral and peripheral pulses. Mean Arterial Pressure (MAP) should at least equal gestational age.

6. **G.I. Abdominal:** Abdomen rounded and soft without distention; bowel sounds present. Umbilical cord white with Wharton's jelly; two arteries and one vein present. Absence of meconium staining, foul odour or drainage. Anus patent. No hepatomegaly or splenomegaly. Kidneys not enlarged.

7. **Genitalia:**
   Female: Labia majora larger than labia minora and may be slightly edematous. Vaginal tag may be present. Transient mucoid vaginal discharge or pseudo menses may be present.

   Male: Foreskin intact and covers glans of penis. Urinary meatus midline at tip. Scrotum large with presence of rugae and may be edematous.

8. **Musculoskeletal:** Ten fingers and ten toes; absence of webbing. Full range of motion in all four extremities; good recoil when extremities extended. Sole creases over anterior two-thirds of each foot.

9. **Hips:** Symmetrical buttocks and thigh folds; absence of hip clicks/dislocation.

10. **Spine:** Spine straight and intact.

11. **Neurological:** Muscle tone strong. Cry is loud and lusty; absence of shrill, high pitch. Alert, responds to stimuli. Posture flexed. Moro, grasp and rooting reflexes present and symmetrical.

12. **Integumentary:** Colour within normal limits for ethnic background. Absence of meconium staining, edema, peeling or bruising. No evidence of jaundice. Mongolian spots may be present in certain ethnic groups. Skin smooth and intact, pliant. Lanugo patchy or absent. Vernix in creases only. Nails soft and pliant but well formed.
